

Ashoka WhiteOak Emerging Markets Trust PLC

www.awemtrust.com

Investment Objective

To achieve long-term capital appreciation, primarily through investing in equity and equity-related securities that provide exposure to global emerging markets.

Summary of Investment Policy

The Company shall invest primarily in securities admitted to trading on any stock exchange (which may include stock exchanges in Developed Markets) that provide exposure to companies that are domiciled in Global Emerging Markets (EMs), or that are domiciled in Developed Markets but at the time of investment, derive a majority of their economic value, revenues or profits from, or whose assets or cost base are mainly located in EMs.

Company Details

Ashoka WhiteOak Emerging Markets Trust plc (AWEM) is a UK investment trust seeking to achieve long-term capital appreciation primarily through investing in a multi-cap portfolio of equities that provide exposure to global emerging markets

Advised by White Oak Capital Partners Pte. Ltd, founded by Prashant Khemka with leading Emerging Markets investment experience

White Oak Capital Group has delivered an exceptional track record for Ashoka India Equity Investment Trust plc as well as other strategies and has £5.9 billion in assets under management or advisory¹.

Analytical approach integral to disciplined research process underpinned by proprietary frameworks - OpcoFinco™ for valuation and ABLEx™ for ESG research²

Emerging markets present potential for higher alpha. EMs remain under-researched and inefficient. AWEM leverages WhiteOak's investment approach to capture the higher alpha potential in these markets

No fixed management fee. Manager remuneration is aligned with alpha generation and hence shareholders' interest. The Investment Adviser is remunerated solely as a function of outperformance over the benchmark.

Performance Review

The Fund was up 1.75% in 3Q 2024, underperforming the benchmark by 0.71%. The key contributors include Alibaba Group Holding (+47.8%), Hong Kong Exchanges (+25.8%), and Prosus (+15.8%), whereas Samsung Electronics (-24.7%), SK hynix (-26.8%), and ASML Holding (-24.0%) were the key detractors.

Market Review

In 3Q 2024, the MSCI EM index was up 2.5%. It outperformed other global indices like the US equities (S&P 500) and MSCI World which returned -0.2%, and 0.3%, respectively.

For the quarter, Consumer Discretionary and Healthcare outperformed, while Information Tech and Energy underperformed. Large caps underperformed mid and small caps this quarter. Among major EM markets, China and Indonesia outperformed, while South Korea and Taiwan underperformed.

Ashoka WhiteOak Emerging Markets Trust PLC

Key Contributors

Alibaba Group Holding Limited (Alibaba) is a Chinese technology company specializing in e-commerce, retail, cloud technology, and payments. Alibaba owns the world's largest B2B (Alibaba.com), C2C (Taobao), and B2C (Tmall) marketplaces, and through its subsidiary Ant Group operates the Alipay payment system that covers over one billion users. Over the years, Alibaba has established itself as the leading player in E-commerce in China across all marketplace formats and has expanded its capabilities significantly in cloud services and international expansion which serve as multi-faceted growth drivers. However, competition in its core e-commerce formats have been intensifying in China from traditional and new ecommerce formats and putting pressure on Alibaba's growth outlook. The recent outperformance in 3Q can be attributed in part to the outperformance of large cap stocks in China. Alibaba has witnessed multiple tailwinds including 1) inclusion in Southbound Connect as at September and 2) expectations for higher ecommerce revenues and margins coming in 3Q as a result of increased monetization of merchants in its e-commerce business.

Hong Kong Exchanges and Clearing owns and operates the only stock and futures exchange in Hong Kong and the London Metals Exchange (LME). HKEX functions as a monopoly in Hong Kong, which is unlikely to change, although it competes for listings with other global exchanges. Overall, HKEX operates in a supportive ecosystem, with the number of listings and trading volumes growing consistently over the years. The 'Connect Program', a market access platform between Hong Kong and mainland China, already represents 34% of the volume and provides a structural growth driver as China liberalizes its capital markets. The stock outperformed in Q3 24 likely due to positive sentiment regarding the economic outlook, in addition to the potential increase in velocity. The management, in our view, has been making prudent decisions regarding capital allocation.

Prosus NV is a global internet and entertainment group and one of the largest technology investors in the world. Prosus is an entity spun off from Naspers in 2019 that houses Naspers' international internet assets and is the largest listed consumer internet company in Europe. The Group's listed investments include stakes of 24.1% in Tencent and 28.1% in Delivery Hero. The underlying value of Tencent is central to Prosus, along with Prosus's holding company discount and unlisted assets. The multi-year buyback, funded by Tencent sales, should support a narrower discount. Prosus' outperformance in 3Q is largely attributed to the outperformance of underlying Chinese assets (especially Tencent). This has been bolstered by the incrementally positive sentiment around Chinese game approvals and earnings beat in 2Q on gaming revenue and margin expansion.

Key Detractors

Samsung Electronics holds a dominant position in the global IT industry, ranking first globally across multiple sectors, including smartphones, memory semiconductors, displays, and TVs. The company is well-positioned for long-term growth, with new technologies such as HBM3e/4, CXL DRAM, 3D NAND, 2nm foundry processes, and flexible OLEDs offering significant potential. Despite its leadership, the stock underperformed in 3Q24, primarily due to lagging its larger peers in high-bandwidth memory (HBM) advancements. Additionally, the conventional DRAM and NAND markets were impacted by prolonged inventory adjustments, resulting in lower-than-expected bit growth and suppressed average selling prices (ASPs) for memory chips. Samsung's mobile division remained stable, supported by seasonal demand and new product launches. However, the display business, particularly in high-end OLED, faced growth constraints due to weak global demand and ongoing inflationary pressures. In the short term, challenges remain as the company navigates inventory issues and macroeconomic uncertainties across key markets.

Sk Hynix headquartered in South Korea, is a leading global semiconductor manufacturer especially focused on memory semiconductors. Globally, SK Hynix is the largest supplier of HBM (high bandwidth memory) technology, the second-largest DRAM chip manufacturer, and the third-largest NAND flash vendor in terms of revenue. The underperformance in 3Q24 was primarily driven by profit-taking following SK Hynix's exceptionally strong performance in the first half of 2024. This was further exacerbated by weaker-than-expected demand in traditional computing and mobile sectors, which dampened investor sentiment. Despite these short-term challenges, SK Hynix remains strategically well-positioned for future growth, thanks to its ongoing investments in next-generation memory technologies such as DDR5 and HBM. These technologies are crucial for the growing demand in AI and high-performance computing, making the company a key player in the industry's long-term trajectory.

ASML Holding is a leading semiconductor capital equipment manufacturer specializing in lithography machines. The company has a global monopoly in the most advanced lithography machines (EUV), which are critical in manufacturing high-performance semiconductors. ASML's primary competitive advantage is its technological edge. ASML derives over 80% of its revenue from Emerging Markets, with TSMC and Samsung Electronics amongst its largest customers. Given the rising digitization and electrification globally, the semiconductor sector is likely to witness structural growth. Investments in generative AI are also driving demand for semiconductor capital equipment. Capital intensity in the manufacturing of semiconductors continues to increase, with lithography taking a larger share of capex, enabling ASML to outgrow the wider industry. Being a monopoly supplier allowed ASML to maintain and expand margins over time. The stock underperformed in Q3 2024 along with its other peers due to concerns around the sustainability of generative AI spending.

Exhibit 9: Opco Finco™ framework

Our investment philosophy is that outsized returns are earned over time by investing in great businesses at attractive valuations. A great business is one that generates superior returns on capital, is scalable, and is well-managed both in terms of execution and governance.

The team strives to buy these businesses when they are available at a substantial discount to their intrinsic value. We do not look at the commonly used accounting-based metrics like P/E or EV to EBITDA, as they can be distorted and misleading. Instead, we rely on DCF and excess ROIC multiple derived from our proprietary OpcoFinco™ framework.

The OpcoFinco™ framework is an adapted version of the DCF that is aligned with our investment philosophy. The framework assesses the economic cash flows generated by the business in excess of the cost of capital. This approach dissects the value of any company between two components:

- Value of the invested capital in the business
- Value of the excess returns on invested capital

Such distinction into components of value is very insightful in understanding the sources of value in a business. Crucially, the excess ROIC multiples are useful in comparing businesses within a sector, as well as across sectors in an apples-to-apples comparison rather than an apples-to-oranges comparison as provided by P/E or EV/EBITDA multiples.

Exhibit 10: ABLEx™ framework

We use our proprietary ESG risk assessment framework ABLEx™ (Assessment of Business Longevity and Excellence) to assess companies on their ESG practices. The framework contains a sector-specific list of ESG risk and opportunities against which a company's practices, policies and disclosures are assessed. The results from our ESG analysis are used in our valuation assumptions.

The ABLEx score, which is a reflection of the ESG practices of a company, is used as an input into the terminal value ascribed to terminal year cashflows of a company along with other fundamental factors (such as superior return on capital, scalability, quality of management teams) driving the terminal multiple. All else equal, a company with a higher ESG score would be awarded a relatively higher terminal multiple. This is a subjective exercise that the team does and there is no set numerical formula or weight assigned to each of the factors.

Further details of White Oak ESG integration can be found at [ESG – Ashoka WhiteOak Emerging Markets Investment Trust Plc \(awemtrust.com\)](https://www.whiteoak.com/ESG-Ashoka-WhiteOak-Emerging-Markets-Investment-Trust-Plc-awemtrust.com)

Important Information

This document has been issued for information purposes only. It does not contain any advice, investment recommendations or any offer, invitation or inducement to invest in the Company. Investors should seek advice from an authorised financial adviser prior to making investment decisions.

Capital may be at risk as the value of investments may go down as well as up and is not guaranteed; therefore investors may not get back the amount originally invested. Past performance is not a guide to future performance, nor a reliable indicator of future results or performance.

The cost of investment may increase or decrease as a result of currency and exchange rate fluctuations. Currency fluctuations will also affect the value of an investment. Investments in shares of smaller companies are generally considered to carry a higher degree of risk as the market for their shares may be less liquid than that for shares of larger companies, making shares of smaller companies more difficult to buy and sell.

The performance of shares of smaller companies may be more volatile than the shares of larger companies over short time periods; therefore investors should regard such investments as long term. There can be no guarantee that the investment objective of the Company will be achieved or provide the returns sought by the Company.

An investment in the Company is only suitable for investors who are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses which may arise from such an investment (which may be equal to the whole amount invested). Such an investment should be regarded as long term in nature and complementary to existing investments in a range of other financial assets and should not form a major part of an investment portfolio.

The Company is a public limited company and an investment trust, the shares of which are traded on the premium segment of the main market of the London Stock Exchange. Accordingly, the ability of shareholders to sell their shares will be dependent on the market price of the shares. The shares may trade at a discount or premium to their net asset value. The Company may borrow money in order to make further investments. This is known as gearing. The effect of gearing can enhance returns to shareholders in rising markets but will have the opposite effect on returns in falling markets.

Economic and market forecasts presented herein reflect a series of assumptions and judgments as of the date of this presentation and are subject to change without notice. Emerging markets securities may be less liquid and more volatile and are subject to a number of additional risks, including but not limited to currency fluctuations and political instability.

None of White Oak Capital Partners Pte. Ltd., Acorn Asset Management Ltd or the Company, nor any of their respective directors, partners, employees, agents or representatives, shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost capital, lost revenue or lost profits that may arise from or in connection with the use of this information.

Views and opinions expressed are for informational purposes only and do not constitute a recommendation by WhiteOak to buy, sell, or hold any security. Views and opinions are current as of the date of this material and may be subject to change, they should not be construed as investment advice.

This is an actively managed portfolio that is not designed to track its reference benchmark. Therefore, the performance of the portfolio and the performance of its reference benchmark may diverge. In addition, stated reference benchmark returns do not reflect any management or other charges to the portfolio, whereas stated returns of the portfolio do.

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which the Company's portfolio is constructed.

The investment manager does not provide legal, tax or accounting advice to its clients. All investors are strongly urged to consult with their legal, tax, or accounting advisors regarding any potential transactions or investments. There is no assurance that the tax status or treatment of a proposed transaction or investment will continue in the future. Tax treatment or status may be changed by law or government action in the future or on a retroactive basis.

Any reference to a specific company or security does not constitute a recommendation to buy, sell, hold or directly invest in the company or its securities. It should not be assumed that investment decisions made in the future will be profitable or will equal the performance of the securities discussed in this document.

In the United Kingdom this material is a financial promotion and has been issued by White Oak Capital Management (UK) Ltd regulated by the Financial Conduct Authority
